

NYI WAI YAN TUN

Software Engineer

Ratchathewi, Bangkok, Thailand | nwai39771@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#) (+66) 82 883 7746

Full-Stack Software Engineer with experience in developing scalable applications across backend, frontend, and database systems. Passionate about building efficient and innovative solutions that solve real-world problems and improve user productivity.

EXPERIENCE

Software Engineer (Full-stack) Intern, Manatal

Jan 2024 - Present

- Worked in an Agile engineering team, managing Jira tickets across the full software development lifecycle, including debugging, implementation, code reviews, QA, and deployment.
- Delivered features, bug fixes, and customer-requested hotfixes directly to production, impacting real users.
- Built LLM-powered pipelines to extract and parse resume and LinkedIn data into candidate profiles, and engineered queue-based microservice workflows for scalable data processing.

Teaching Assistant, Mae Fah Luang University

Aug 2024 - December 2025

- Assisted students in mobile and web development labs, providing hands-on guidance while strengthening problem-solving and communication skills through one-on-one support.

End-user IT Support, YOMA Bank

May 2021 - July 2022

- Provided technical support for software, hardware, and network issues, including system setup, installation, and maintenance of workstations and peripherals.
- Collaborated with developers and IT teams to troubleshoot and resolve issues remotely and on-site.

PROJECTS

Peertube: Peer Tutoring System - Next.js, Supabase, Tailwind ([Github](#)) ([Demo Video](#))

- Developed a full-stack peer tutoring platform with tutor, student, and admin workflows, featuring session management, financial dashboards, refunds/reports, and Stripe PromptPay payments.
- Integrated full-text search, Google OAuth, real-time chat, Firebase notifications, Resend email, and automated background tasks with cron jobs.
- Optimized performance with Supabase queues, server-side prefetching, and SSR for improved scalability and SEO.

Trideo: Learning Analytic System - Vue.js, Node.js, MongoDB, Kafka ([Github](#)) ([Vercel link](#))

- Built a full-stack video learning platform with an admin dashboard for tracking user analytics (visits, views, completions).
- Implemented Google OAuth, Cloudinary/Multer video uploads, Kafka event streaming, and Prisma with MongoDB Atlas.
- Deployed on Vercel (frontend), Render (backend), and Fly.io (Kafka worker).

Asset Borrowing Mobile App - Flutter, Node.js, MySQL ([Github](#))

- Built an asset management system with role-based booking, borrowing, and returning workflows.
- Implemented JWT authentication, email OTP verification, automated status updates, and Cloudinary/Multer image uploads.

SKILLS

Technical Skills

- Languages: Javascript, Typescript, Python, Java, Dart
- Frontend: Vue.js, React, Next.js, Tailwind CSS, Bootstrap
- Backend: Node.js, Nest.js, Django, FastAPI
- Databases: PostgreSQL, MySQL, MongoDB, Redis, Supabase, Firebase
- DevOps & Tools: Docker, Kubernetes, Kafka, RabbitMQ, Git, Flutter, Stripe API
- Automation and AI: n8n

Languages

- Burmese (Native), English (IELTS Band 7.0), Thai (Learning)

EDUCATION

B.Eng. Computer Engineering, Mae Fah Luang University

Aug 2022 - April 2026

- GPAX : 3.97
- MFU Scholarship (2022 - 2025)

CERTIFICATIONS AND ACHIEVEMENTS

- Huawei HCCDA - Tech Essentials Certification
- First to Solve Problem H – Myanmar Collegiate Programming Contest (MCPC)
